## After upgrading, all my lists, clippings and many other sidebar items appear to be gone

Dawn Messerly - 2015-12-13 - in MacGourmet Deluxe 4

For some users, the RECENT and MY LISTS sections of the sidebar are hidden when launching version 4 for the first time.

If you hover over RECENT and MY LISTS, you will see the option to Show/Hide the lists.

If that doesn't resolve the issue, please contact support at [support@marinersoftware.com](mailto:support@marinersoftware.com)
