Can I sync my MacGourmet 4 data with MacGourmet Touch for iPhone or MacGourmet Touch for iPad?

Dawn Messerly - 2015-12-13 - in Gourmet iOS

Unfortunately not. Only MacGourmet Deluxe 4 (not MacGourmet 4) supports syncing through the Mariner Cloud sync server. Gourmet for iOS, developed and published by Mariner Software and introduced in 2013, does support syncing MacGourmet Deluxe 4 data through the Mariner Cloud sync server. MacGourmet Touch for iPhone and MacGourmet Touch for iPad, originally developed and published by Advenio, do not support syncing MacGourmet or MacGourmet Deluxe data through the Mariner Cloud sync server and have been removed from the App Store since the release of Gourmet for iOS.
