## Does Calc XLS open Excel xlsx files?

Jim Henson - 2015-03-24 - in Calc XLS

Does Calc XLS open Excel xlsx files? I'm trying to open an xlsx file and Calc XLS won't do it, what gives?

Calc XLS supports the .xls format at this time, .xlsx (their xml format that supports up to 1 million rows) is not a supported file type. We have plans to add this file type in the future.
