Does Contour for Windows support languages other than English?

Jim Henson - 2015-03-24 - in Contour (Win)

Does Contour for Windows support languages other than English?

No. Contour for Windows does not support languages other than English.

Contour has been shown to run fairly well on non-English Windows systems, but it only supports Roman non-accented characters.

Contour does not support any non-Roman character sets (like Cyrillic, Kanji, etc) and does not support accented Roman characters.
