Does Montage have page numbering?

Page Numbering is part of Montage since the beginning. Page numbering is setup in the Header area and occurs when you print. The user guide covers page numbering in print headers on page 82. You can access the user guide under the Help menu as "Montage User Guide"

Here is the text:

****Setting Print Headers****

Headers are text that appears on the top of every printed page (Title page excluded).

To set up print headers:

From the File menu, select Document Properties...

A sheet appears.

Select the Printing tab.

Type in the text you wish to appear in the header of your printed script.

Use the following guide for page number, page count, and title:

- %p = page number
- %c = page count
- %t = title

When you are finished, click the Close button.

***Note:** Headers appear on the printed page but not in the on-screen views.*

***Note:** If you want the Title page to print, be sure to place a check mark next to Print Title Page.*
