## How do I select a range of rows or columns in Calc XLS?

Jim Henson - 2015-03-24 - in [Calc XLS](#)

How do I select a range of rows or columns in Calc XLS?

Using multitouch gestures, it's easy to select multiple rows or columns in Calc XLS. To select a range of rows or columns:

1. Tap and hold on the first row or column to select it.
2. With another finger, tap on the final column to select it.
