Mariner Software

How do I update a Mariner program under Windows?
Customer Service - 2019-02-15 - in Tips - Windows

- The Mariner program I am using under Windows is notifying me there is an update available. How do I apply the update?

- How do I update a Mariner program that I use under Windows?

To update a Mariner program under Windows, follow these steps:

1. Make sure the application you are updating is not currently running. Quit the application if necessary.

2. Download the most-recent update compatible with the version of Windows you are currently using. You can download updates for our applications from either of these pages:

   - The Downloads page on our Website

   - Our Download mirror

3. Once the .ZIP file has finished downloading, unzip ("open") the .ZIP file and run ("open") the installer file. The name of the installer file will contain the letters **SFX** and end in **.EXE**. Depending on preferences you currently have set in Windows, the .EXE file extension may- or may not appear.

Complete the installer program to finish installing the update.
