How does Paperless 3 work with business cards?

Logan Ryan - 2018-12-17 - in Paperless for Mac OS

Admittedly, business cards aren't our strong suit. We are skeptical that they hold the same importance as they once did several years ago so the demand for more support in the app really hasn't been there. Users can scan and store business cards as documents, and then tag them or create a card category.
