How does Paperless work with Scansnap Home?

Logan Ryan - 2018-12-05 - Paperless for Mac OS

We do have ScanSnap Home support being rolled out in Paperless 3, sometime in December of 2018. Until then, for Paperless 2, uninstalling ScanSnap Home and re-installing ScanSnap Manager. SSM will still install on Mojave on the Mac on discontinued ScanSnap scanners without any problems other than the warning about future support for 32-bit apps, and it works just fine with Paperless 2.5.

Alternatively, until Version 3 is released, one could use ScanSnap Home to save to the desktop then drag and drop the pdf into Paperless. It's not the most elegant solution but should work for now.
