I would like to be able to click on the web links in documents and have it open in my web browser. Can Write do that?

Jim Henson - 2019-02-19 - in Mariner Write

I would like to be able to click on the web links in documents and have it open in my web browser. Can Write do that?

Mariner Write does support Hypertext, hyperlinks, weblinks, clickable-text, what ever you like to call them. Command-clicking on a web url will "take you there". The text ought to include the prefix 'www.' or 'http://'.
