The toolbar in my reports view draws incorrectly, with overlapping buttons

Dawn Messerly - 2022-05-20 - in Reports

When I go to reports view, a portion of the toolbar draws incorrectly. Buttons and other toolbar items overlap and don't work correctly. How do I resolve this?

If you are seeing the toolbar appear incorrectly in Paperless reports, there is an easy workaround:

1. Quit Paperless
2. Click in the Finder
3. From the Go menu in the Finder, select Go to Folder ...
4. Go to the following folder (I suggest copying and pasting this line):
~/Library/Application Support/Paperless
5. Inside that folder, you will find a folder called "reports". Move the "reports" folder to the Trash
6. Re-launch Paperless
