## What happened to Paperless Lite?

Mike Wray - 2017-02-07 - Paperless for Mac OS

In February of 2017 we ended development of Paperless Lite. The original goal for PL was to provide a low cost, featured-reduced product that would focus only on receipts. What we found out is that most users ended up upgrading to the full version of Paperless anyway. Moving forward, we will only be developing the full version of Paperless.
