What happened to version 1?

Dawn Messerly - 2019-04-23 - in Paperless for Windows

Is 2.0 the first release of Paperless for Windows? What happened to version 1?

The first release of Paperless for Windows is 2.0. There was never a version 1.0 of Paperless for Windows.

We chose to call our first release of Paperless for Windows version 2.0 for a very simple reason, and that was to match the Mac version on which Paperless for Windows was based.
