

## What is different about the Timeline View in StoryMill 4?

Jim Henson - 2024-04-26 - StoryMill

What is different about the Timeline View in StoryMill 4?

In StoryMill 4's new timeline view:

- You can view any length of time, up to millennia
- You can choose display units from minutes to centuries
- Scene banners now display with a minimum length for readability
- When zooming out, scenes are grouped together instead displaying illegibly small
- Scenes with no date/time associated with them don't display on the timeline, but display in a scenes palette where they can be dragged onto the timeline
- Dates for scenes and events can be assigned with a calendar-based picker
