What's new in Paperless 2.0.2?

Here is what's new in Paperless 2.0.2:

Fixes

- Resolved an issue that would result in crashes when making changes to or configuring reports.
- Resolved an issue where closing a window before focus had been changed from the current field in the Details pane could result in loss of metadata.
- Resolved an issue where control elements in Reports View (such as the View Options button) were included in report printouts.
- Resolved an issue that resulted in fields in the Details Pane not accepting input while the integrated document viewer was open.
- Resolved an issue where smart collection parameters using "is not" or "does not contain" statements in reference to the Category or Subcategory fields would ignore items where the field referred to was empty.
- Resolved an issue that resulted in tags and custom items not being copied to read-only (e.g. burned to CD) libraries.
- Resolved a bug where Library Configuration was shown for read-only (e.g. burned to CD) libraries.
- Resolved a bug where Paperless appeared to allow data entry for read-only (e.g. burned to CD) libraries.
- Resolved an issue where the amount field at the bottom of the center pane included values in the Amount field for library items that the Amount field is not assigned to (under Library Configuration).

Additional Changes

- After importing a document, Paperless now selects the first field in the Details pane (after a short delay).
- After Recognize Text is run, Paperless will now select the first field available in Details pane (after a short delay) if another document is not selected while

Recognize Text is running.

- Added a pulldown menu in Library Configuration (under Document Types) for the user to set a preferred document type (OCR on import will still attempt to recognize/ set the document type as receipt).
- Reenabled "Prompt for a Second Side" (under Preferences > Scanner).
- For the Receipt document type, Paperless now displays "Merchant" for the Title field.
- Paperless 2 now shows the serial number of a serialized copy of Paperless 1 installed on the same Mac.
