 What's new in Paperless 2.0.4?

Here is what's new in Paperless 2.0.4:

- Added 1-up, 2-up and 4-up options to Expense Reports.

- Added the ability to represent Splits information in report view.

- When hitting Done after entering metadata, Preview now loads the next item in the list.

- Default document type will now override Paperless's "guess" at the scanned/imported document type.

- Paperless will be less likely to interrupt manual metadata entry and auto-complete fields with data detected in the scanned/imported document.

- Opening items in the viewer should no longer require resizing or scrolling to veiw the entire page.

- New Collections and Smart Collections are created with the column selection/arrangement of the Library view.

- Column visibility and arrangement are now shared between List and Cover Flow views.

- Collections sort order is now remembered.

- Searching for a receipt by amount now returns valid results.

- Paperless now displays a warning when you navigate to reports view when a collection containing many items is selected. The warning indicates that the reports view may take a long time to load.

- Added a warning when changing a field's type.

- Fixed a list sorting problem in Library Configuration that would be apparent when creating a new field.

- Fixed a crash that would occur when an open item was combined with other items.

- Fixed issue where changing metadata in a document when the document is visible could change the scroll location in the view.

- Fixed an instance where keyboard navigation quit working.

- Updated links in the Help menu.

- Fixed typos and other minor errors in Help.
