What's new in Paperless 2.1.5?

Here is what's new in Paperless 2.1.5:

- Compiled to run on OS X 10.6 and later.
- Made changes to toolbar buttons in Reports View.
- Made changes to the way the OCR process is handled within Paperless.
- Made adjustments to OCR pre-processing, changing the way images are prepared for OCR.
- Made adjustments to OCR post-processing, to address situations where valid text was being omitted from OCR results.
- Made adjustments to OCR post-processing, to correct misspellings of certain keywords used in auto-populating metadata fields.
- Addressed an issue where dates in specific formats were not being recognized when auto-populating field values.
- Added text labels to specific sections of the segmented view controller button (in the Toolbar).
- Removed the "What's new in Paperless 2" window that would appear every time a new release is run for the first time.
