When I'm typing Dialogue, how to I get to the Action element?

Jim Henson - 2024-04-25 - Montage

When I'm typing Dialogue, how to I get to the Action element?

Regardless of which template you are using, when typing in any element, hitting the return key and typing Cmd-2 will take you to Action. You can also change to Action by selecting Action from the Format menu (select Action from the Element sub-menu), or by choosing Action from the popup at the bottom of the Montage window.

You can also set Action to be the Next Element for Dialogue (see the previous FAQ for instructions).
