When I scan using the ScanSnap, I receive a message that The ScanSnap Profile named Scan to paperless does not match the Paperless Default Profile. What do I do?

As stated in a previous FAQ, Paperless provides for the seamless integration of the ScanSnap scanner and the ScanManager or Home within Paperless. This message pops up when the Scan to Paperless profile has been modified in ScanManager or Home. If you want to revert back to the original default settings, click the Yes button. If you want to keep the modifications you have made to the Scan to Paperless profile in ScanManager, then click the No button.
