What are the system requirements for Paperless for Windows?

Jim Henson - 2017-06-12 - Paperless for Windows

Here are the system requirements for Paperless for Windows:

Operating System/ Software

- Windows 8 or newer
- Latest version of Adobe Reader ([get the latest release of Adobe Reader here](#))

Scanner

If you plan on using a scanner with Paperless, we also recommend the following:

- Fujitsu ScanSnap scanner using ScanSnap Manager (recommended), TWAIN, or Windows Image Acquisition (WIA) scanner

Please be sure that your scanner is supported by the manufacturer for use under your current operating system.

- Latest releases of driver software and firmware for your scanner

If it is not possible to import with software provided by your scanner's manufacturer, we suggest WIA as a workaround.

Frequently Asked Questions

Is Paperless for Windows supported for use with Windows 10?

Yes, we are Win 10 compatible

Will Paperless for Windows work with Windows XP?

Maybe: it may be possible to run Paperless for Windows under Windows XP. Users have reported that it is possible to run Paperless for Windows under Windows XP.

Because we do not officially support using Paperless for Windows under Windows XP, we will unfortunately be limited in our ability either to troubleshoot any issues that appear to be specific to Windows XP or resolve any such issues in Development.

Was there ever a release of Paperless for Windows that was supported for use under Windows XP?

No. Paperless 2.0.0 was released with support for Windows Vista and later. Use of Paperless for Windows under Windows XP was never officially supported.
