Why can't I download contacts from the demo version of Montage?

In addition to importing contacts from Address Book, Montage offers the option to download industry contact information. Contact information is provided, for example, for film and animation studios, production companies, and literary agents.

Currently, this option is not available in demo copies of Montage; it is available only in copies with valid serialization.

Licenses for Montages can be purchased online though our eStore. To learn more about Montage in-general, see Montage's product page on our Website.
